

Palm Sunday parade

Our Palm Sunday was so much fun last year, we plan to continue it every year. The church members drove in their cars around the perimeter of the church several times while waving palm fronds, cuttings from their own yard or even paper palm cut-outs. We did not provide them from the church other than we shared the link to print them out. The church staff then stood in front of the church and waved at the cars as they passed. So essentially the congregation was the parade. Because they were going in a square around the block, it did help to have a set number of laps that everyone would go around, rather than just an arbitrary time. We started at a certain time, and it lasted however long it took everyone to drive 4 (I think) times around the block. I don't remember if we had music playing, but we do have an fm transmitter that I think would work to transmit music through the car radios. It was something very simple and fun! I am not seeing any pictures on our facebook page, but I will keep looking.

This is link we shared to print the palms
